

Meet the Guru

🚀 Welcome to vGuru Tech Academy! ✨

Hey there, awesome kids and super parents! I'm Satya Dillikar, your friendly neighborhood tech wizard and the head honcho at vGuru Tech Academy in Milpitas. Guess what? I was a super brainy Gold Medalist in Computer Science & Master from the cool Indian Institute of Technology (IIT) - Madras, India. 🏆 After spending 25 amazing years creating magic in companies like VMware, Broadcom, and Cisco right here in Silicon Valley, I decided to chase a dream - a dream to make technology super fun and exciting for you, the next generation of tech superstars! 🌈💻

At vGuru, we don't just play with technology; we dive into the world of coding and discover its secrets! 🧑🎓 Imagine not just playing games on your computer or phone but actually learning how to create them. How cool would that be? You'll learn to break down big ideas into small, fun parts, understand how things work, and even make them better. 🎮🧩

Coding isn't just about tapping on keyboards; it's a fantastic adventure where you'll learn to solve puzzles, be patient, think logically, and let your creativity soar. You'll work with friends, solve tricky problems, and share your awesome ideas. It's not just about coding; it's about becoming a mini-genius in just about everything! 🧠✨

Whether you dream of becoming a scientist, an artist, or even an astronaut, coding is your first step into a future full of amazing possibilities. 🚀🌐 Want to know more about this exciting journey and your guide (that's me!)? Check out my LinkedIn Profile (<https://www.linkedin.com/in/satya-dillikar/>) and my website(<https://softbuild.dev/>). Let's get ready to code and create wonders together at vGuru Tech Academy! 🎉👥👨🎓
